EDUCATION

SMK Negeri 1 Garut

Vocational High School, Software Engineering

Garut

2023 – May 2026

EXPERIENCE

Freelance / Self-Employed

January 2025 – Present

Full-Stack Engineer

- Designed and developed robust backend architectures and scalable RESTful APIs using Laravel and Go, ensuring high-performance data processing.
- Streamlined deployment processes by containerizing applications with Docker and automating production releases using custom Bash scripts to optimize costs.
- Deployed and managed web applications on Virtual Private Servers (VPS) and cloud environments, optimizing Nginx configurations and server security.

Nempo Garut Project

August 2025 – November 2025

Part-Time Backend Developer

- Developed and integrated new administrative modules into the existing core platform using Laravel, enhancing data management efficiency for administrators.
- Diagnosed and resolved critical software bugs and system issues, ensuring platform stability and improving overall user experience.
- Maintained and optimized the admin panel backend logic, implementing secure role-based access control and efficient data querying.

PT. Sentosa Teknologi Gemilang

July 2025 – November 2025

Internship – Backend Developer

- Developed high-performance, asynchronous backend services for a healthcare platform using Go, ensuring fast and reliable data processing.
- Deployed scalable cloud infrastructure on AWS using Terraform (Infrastructure as Code), streamlining environment provisioning.
- Built and maintained robust RESTful APIs using Laravel to power a mobile travel application, managing core features and dynamic content delivery.
- Designed a comprehensive content management admin panel enabling administrators to manage tourist destinations, system configurations, and front-page layouts.

PROJECT HIGHLIGHTS

RHD Law Firm Management Portal

April 2026

- Engineered a feature-rich corporate portal using Laravel to manage legal firm workflows, client cases, and internal business logic.
- Implemented advanced backend features including a multi-tiered Role-Based Access Control (RBAC) system and an internal financial tracking module.
- Developed a secure document management system with data encryption for sensitive legal files, alongside Midtrans payment gateway integration to automate client invoicing.

SatuSehat Connect

November 2025

- Developed a high-performance backend using Go and PostgreSQL, successfully qualifying for the AWS Startup Program with \$10,000 in cloud funding.
- Integrated multiple third-party health and data APIs to ensure real-time synchronization and secure data processing.
- Deployed the platform's live demo environment on AWS, optimizing cloud resource allocation and server configurations.

Wirahebat LMS Platform

December 2025

- Built a custom Learning Management System utilizing a Laravel backend and Next.js frontend to deliver a responsive, seamless educational experience.

AWARDS & ACHIEVEMENTS

6th Place – Lomba Kompetensi Siswa (LKS) Cloud Computing

June 2025

Dinas Pendidikan Provinsi Jawa Barat

- Achieved 6th place out of top regional competitors across West Java in the vocational cloud computing championship.
- Earned a final score of 93.95/100, with perfect scores (100/100) in both the Technical Essay and Interview presentation categories.

SKILLS

Programming Languages:	PHP, Go
Frameworks & Libraries:	Laravel, Next.js, FastAPI, React
Databases:	PostgreSQL, MySQL
DevOps & Cloud:	AWS, Google Cloud Platform (GCP), Docker, Podman
Web Development:	HTML, CSS
Tools & Administration:	Git, Linux, Bash Scripting, Nginx
Soft Skills:	Public Speaking, Technical Communication
